# Background & Objectives

- Feeling belonging to a group is a core element of one's social inclusion<sup>1</sup>.
- •Understanding and monitoring services designed to enhance social inclusion requires measurable indicators, based on transparent and valid definitions of outcomes.
- •The literature on "sense of belonging" spans many disciplines and lacks a cohesive definition.
- We reviewed this literature to develop a transdisciplinary conceptualization of belonging to support researchers, policy makers, and service providers design and evaluate services for persons with intellectual disabilities.

### Methods

We searched multiple databases, for the term "sense of belonging"; limited to English language publications from 1990 to July 2011.

Inclusion criteria: 1) qualitatively explored the meaning of sense of belonging; 2) the meaning of a sense of belonging emerged as a theme; 3) quantitatively measured sense of belonging as a dependent or independent variable.

## **Article Selection**

Articles were reviewed until saturation in key concepts to define a sense of belonging was reached.

### **Definition Development**

Existing definitions, main trends, and critical themes were categorized into coherent, meaningful statements.

#### Results Figure 1. Literature review process and results Education **Immigration** 5 common SELFthemes Disability Culture Religion Qualitative **RECIPROCITY DYNAMISM** Articles identified across 40 articles included many disciplines

### Table 1. Describing the thematic concepts of a sense of belonging

Component of Definition	Description
Subjectivity	-Is a perception
	- Feelings of fit, respect, value
Groundedness	-Referent group anchors the feeling
	-One belongs to something/someone
Reciprocity	-Sense of relatedness or connectedness
	-Built on shared experiences, understanding
Dynamism	-Influenced by social and physical environment
	-Feeling is fluid; may not be permanent
Self-Determination	-Right of the individual to choose to belong
	-Influenced by perceived power differentials

### Final Definition of a Sense of Belonging

A sense of belonging is a **subjective feeling** of value and respect derived from a **reciprocal relationship** to an external referent that is built on a foundation of shared experiences, beliefs, or personal characteristics. These feelings of external connectedness are **grounded** to the context or referent group, **to whom one chooses, wants and feels permission to belong**. This **dynamic phenomenon** may be either hindered or promoted by **complex interactions between environmental and personal factors**.

# **Future Directions**

Effective programs must aim to increase a user's sense of belonging. Developing measurable indicators to capture this service outcome will aid researchers, service providers and policy makers in understanding the impact of services on a users' sense of belonging and improving social inclusion.
